

## Are you ready for the 4<sup>th</sup> industrial revolution?

Increase the flexibility, efficiency, and profitability of your production site today to be ready for the challenges ahead.

Use FACTORYMINER—the MES for the Industrial Internet—and benefit from our solution for production data collection (PDC), machine data acquisition (MDA) und OEE analysis.

### Production Data Collection

order and shift data, production quantities, setup / maintenance / downtime information

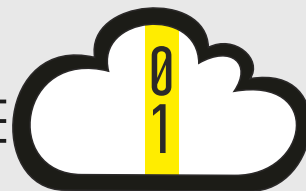

### Machine Data Acquisition

production quantities, machine states, process data (temperature, pressure, etc.)

### ERP / PPS Interface

product / shift / order master data, feedback of production quantities etc.

### Reporting / OEE Analysis

trend analysis, pareto analysis, benchmarks

### Production Monitoring

order progress, Andon boards, real time notification / alerts

### Traceability

information for quality and complaint management

### Instantly ready to use

After setting up your accounts you can immediately use our solution productively. Tedious installation and commissioning phases are a thing of the past.

### Anytime and anywhere

No matter where, when, or on which device—whether on a smartphone on a business trip or a panel-PC on the shop floor. You just open your browser and off you go.

### Pay-per-use

No high acquisition and operating costs, no long-term capital commitment. Take advantage of our scalable solution available at a fixed monthly subscription fee.

## Your benefits

### Productivity improvements

- reduction of unit and process costs
- improved cycle times
- decreased downtimes
- fault prevention
- increased delivery performance
- less scrap and rework

### Real time information

- order progress
- visualization (e.g. Andon-boards)
- maintenance notification / alerts
- feedback for planning systems etc.

### Flexibility

- optimized setup times and costs (SMED)
- optimized capacity utilization and load distribution

### Compliance

- complete order / product / batch tracking
- support for complaint management
- quality management (ISO 9000, ISO/TS 16949)

### Data source for the management

- input for CI, 6S, Kaizen
- value stream mapping
- final costing

## ...and all that at a fixed monthly fee:

### 5

machines or  
manual workstations

**€ 59**

per month and  
machine/manual workstation  
excl. VAT

### 6 to 99

machines or  
manual workstations

**€ 49**

per month and  
machine/manual workstation  
excl. VAT

### from 100

machines or  
manual workstations

**€ 39**

per month and  
machine/manual workstation  
excl. VAT

Each fee listed above includes the use, operation and maintenance fee for the MES-software FACTORYMINER for one machine or one manual workstation per month. Beyond that there are no additional fees.

The minimum contract period is one year (base period). Subsequently the contract automatically extended for another year (renewal period) until the contract is terminated by either party by written cancellation three months to the end of the base or a renewal period. The fee is charged annually in advance.

Charges for optional IT or consulting services are billed at cost.
